The alternative: EFS 180 E
universal machine with chassis

Areas of application
- For compacting, planing, filling in surface irregularities, abrading, grinding, cleaning and keying screed
- On industrial flooring, skim coats: for applying primer, for planing and levelling sloping floors or edges, for compacting and planing synthetic resin flooring
- For intermediate sanding, waxing and polishing on parquet and cork floors
- For keying filler and anhydride self-levelling screed
- For removing surface residue and blemishes

The EFS 180E with chassis is easy to handle, robust and simple to transport. The infinitely variable guide handle with chassis can be adjusted to the height of any operator in seconds. The machine is easy to guide, the plates and brushes can be exchanged without effort using a quick coupling. And finally thanks to its infinitely variable speed control this machine can be employed for a whole range of tasks.

The advantages
- Star screw for removing the chassis from the machine
- Connector cable with right-angle plug
- Outlet for dust extraction
- Protective rubber ring on the housing
- Automatic start interlock to prevent the machine being switched on unintentionally
- Infinitely variable speed control
- Double strain relief, 15 m tear-resistant cable with an excess-current circuit-breaker
- Clamp lever to infinitely adjust the guide handle
- Maintenance-free, long-life belt drive smooth-running chassis.

Special accessories:
(Not included in the standard scope of delivery)

Add-on weights
The bracket fixture including 4 additional weights, each weighing 5 kg is available as a special accessory for specialised jobs.
The grinding pressure during work can be increased by adding these weights. The machine can thus be adapted to suit individual tasks.

Dust protection ring
When used in conjunction with an industrial dust extractor, the dust protection ring ensures that work is almost dust-free.
Stainless steel ring with exchangeable clip-on brush.
