

# Cordless planing machine for edgework RHG 300

- Synthetic disk for compacting screed and concrete
- Planing disk with metal planing blades
- Special free-wheel function
- Robust hammer driver drill with solid metal planetary gearing, two batteries and quick-release chuck
- Case for transportation

In order to achieve an even, smooth and uniform surface, it is just as important to compact and plane the edges of screed flooring with a machine as it is to treat the rest of the surface and this tool is perfect for that very job. The charging time and the operation time are co-ordinated such that you can work almost without interruption when both batteries are used alternately.

## Technical data

Makita cordless hammer driver drill BHP 454  
Speed: lower speed infinitely variable up to 400 rpm  
Hammer mechanism: at lower speed up to 6,000 blows  
Lithium-ion battery 3.0 Ah/18 V  
Charging time: 20 minutes  
Ø tool 300 mm (disk/bladed planing disk)
